Professional Overview

Software Developer Intern with hands-on experience in cloud cost optimization, application deployment, integrations, and Full-Stack Development. Skilled in Python, SQL, JavaScript, React.js, Django, REST APIs, Docker, and Git. Strong foundation in Machine Learning, Data Structures, and full-stack development, with excellent analytical, problem-solving, and communication skills. Passionate about continuous learning, building scalable solutions, and collaborating effectively in dynamic environments.

Experience

Software Developer Intern | CloudPi (PurpleData Inc), Bengaluru | Aug 2026 – Present

- Gained hands-on experience working on a cloud cost optimization platform, understanding its architecture, workflows, and application functionality. Contributed to Slack integration development, Dimension design and deployment and performed end-to-end testing for user management and other application workflows.
- Worked with Python, Node.js, React.js, REST APIs, MySQL, ClickHouse, Docker, Git/GitHub, AWS, and Azure in a collaborative development environment.

Python Full-Stack Development Intern | Pentagon Space | Feb 2026 – July 2026

- Completed a project-based Python Full-Stack Development training internship focused on web application development.
- Gained hands-on experience with Python, SQL, Django, React.js, JavaScript, HTML, CSS, and REST API fundamentals.

Technical Skills

Python | SQL | HTML & CSS | React | Django | Data Structures & Algorithms | Artificial Intelligence | Machine Learning | AWS | Azure | ML Libraries | JavaScript | Power BI & Tableau | Figma | GitHub | Docker | REST APIs | Analytical Tools

Projects

Energy Consumption Forecasting and Recommendation Agent | SDMIT | Feb 2025 – Dec 2025

Developed a full-stack AI-powered web application to analyze household energy consumption, forecast future electricity usage using XGBoost, estimate electricity bills, and generate personalized energy-saving recommendations. Contributed to backend development, ML model implementation, JWT authentication and model performance evaluation.

Technologies used: Python, XGBoost, Django, SQLite, Pandas, Data Visualization | [GitHub Link](#)

SmartConnect

Independently developed a full-stack college management system with dedicated Admin, Teacher, and Student portals using Python, Django, SQLite, HTML, CSS, and JavaScript. Implemented data visualization features using Matplotlib and integrated a job portal to support academic management and career-related functionality.

Technologies used: Python, Django, HTML, CSS, JavaScript, SQLite, Matplotlib | [GitHub Link](#)

Education

B.E - Artificial Intelligence and Data Science | SDM Institute Of Technology, Ujire | CGPA- **8.59** | 2022-26

12th | Deeksha CFL PU College, Bengaluru | **85.33** | 2020 – 22

10th | Cauvery Public School, Mandya | **85.83** | 2014-20

Certificates

AWS Certified Cloud Practitioner, FOCUS (FinOps), Python Full-Stack Development, Natural Language Processing, Google Cloud Project Fundamentals for DevOps, Artificial Intelligence and GenAI Tools | [Google Drive](#)

Additional Projects - PDF to Audio Converter | Quiz Agent | T20 Match Winner and Score Predictor | Sonic Cart
